

## COMMONLY ASKED QUESTIONS

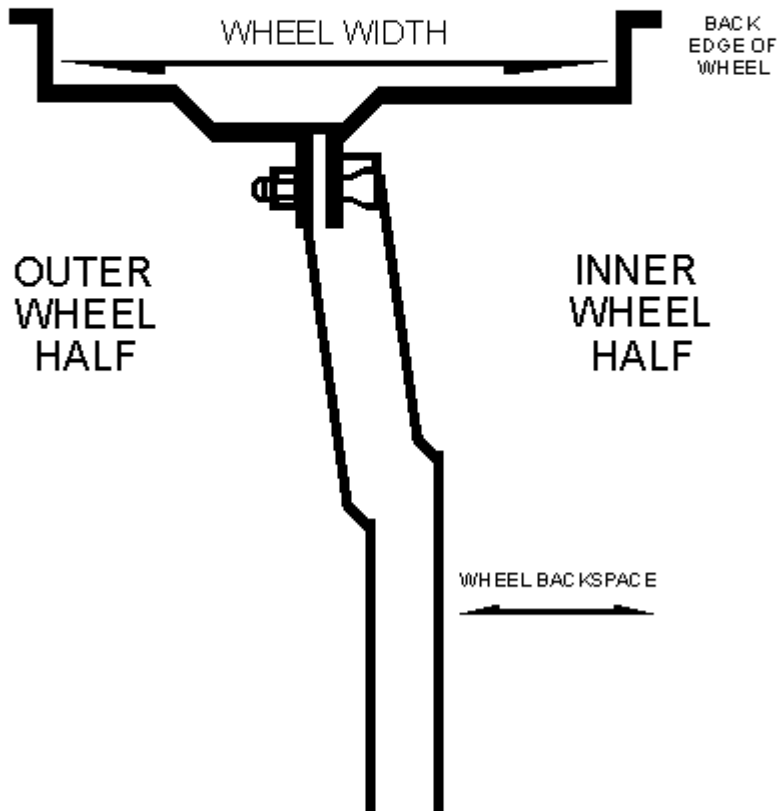

### What advantages will I gain if I use Bogart Racing Wheels?

One of the best ways to gain performance is by removing weight. While removing static weight will help, there is truly no comparison to removing rotating, or un-sprung, weight. While every application is different, we have seen improvements by as much as 2 tenths in 5.0 liter Mustangs, and almost a full second in normally aspirated Hondas by switching to Bogart Racing Wheels.

### Why are Bogart Racing Wheels not intended for street use?

Because we manufacture Bogart Racing Wheels for a specific application (racing), we remove as much mass (weight) as possible, while maintaining enough structural integrity to be sure that Bogart Racing Wheels will survive through their intended purpose.

### How do I measure backspace and wheel width?

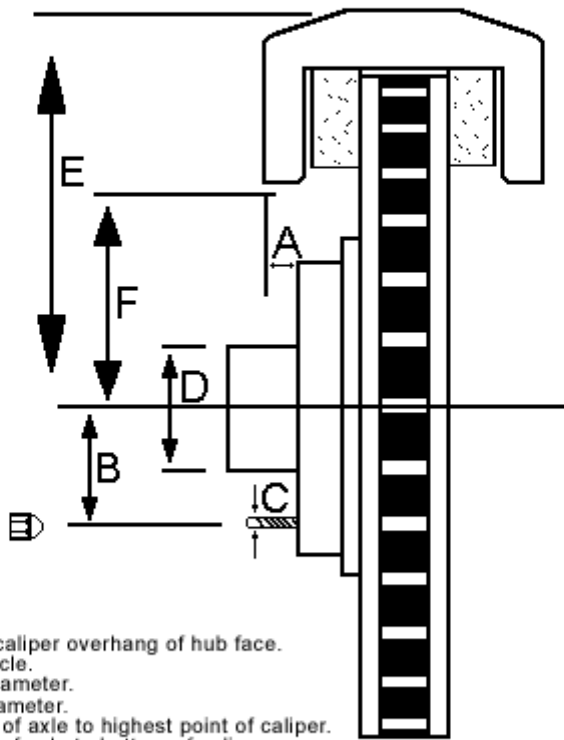

### Can Bogart Racing Wheels build a wheel that will fit my car?

Bogart Racing Wheels manufactures wheels in sizes ranging from 13" to 17" in diameter and from 2" to 20"+ wide.

### Will Bogart Racing Wheels clear my brakes?

Bogart Racing Wheels have been able to fit most applications. However, we still want to be sure we can fit your needs before we build your wheels. Please click here to see a diagram with the measurements we will need.

- A= Brake caliper overhang of hub face.
- B= Bolt circle.
- C= Stud diameter.
- D= Hub diameter.
- E= Center of axle to highest point of caliper.
- F= Center of axle to bottom of caliper.

### Can Bogart Racing Wheels repair my wheels if they get damaged?

Bogart Racing Wheels can often repair wheels that are damaged. We also have replacement parts for many after-market wheels. However, we will need to see any wheels that are in question. Please do not call to ask about repairing wheels. Instead, ship your wheels to Bogart Racing Wheels, 10704 Prospect Ave. Ste. A Santee, CA 92071. Be sure to include your name, address and phone number with your wheels.

### **Why can't my wheels ship in 1-2 days?**

Because Bogart Racing Wheels builds custom wheels that encompass so many styles, sizes and bolt patterns, it is impossible to keep all these completed wheels in stock. However, we do try to keep some of our more popular styles and sizes in stock.

### **What happens if I get my wheels and they don't fit?**

When you receive your Bogart racing wheels you need to check fitment on the car before you mount tires on your wheels. If the wheels were built to your specifications and they don't fit, you may be able to return them for a 25% restocking fee (depending on size, backspace, style, etc.) However, we will not accept wheels back for any reason that have been mounted.

### **Do I need to use special lug nuts?**

Yes. All of our racing wheels require a specific type of lug nut. They are available from us or you may purchase them from many race shops and auto parts stores.

### **Do I have to use tubes in my wheels**

No. While some will choose to use inner tubes, Bogart Racing wheels are guaranteed leak free. This allows you to not use inner tubes, again decreasing rotating, or un-sprung, weight.

### **How do I care for the finish on Bogart Racing Wheels?**

The finish on Bogart Racing Wheels is achieved from custom show polishing the aluminum halves. There is no coating on our wheels. However, with regular maintenance the show appearance will remain for some time. If a wheel should require polishing, a non-abrasive polish will work to keep the appearance. We recommend Auto-Sol Polish and is available from Bogart Racing Wheels.

### **What are some safety issues I should be aware of?**

All wheels and accessories are for racing only. They are not intended for street, road or highway use. They should not be used on race cars being towed. They are to be used only on track, courses, or strips designated for racing only. They should be used for their intended purpose (i.e. road race wheels for road racing only, drag race wheels for drag racing wheels only, etc.)

Never inflate tires higher than recommended tire pressure.

Rim bolt torque settings are 11ft. lbs. For 5/16 inch and 5ft. lbs. For ¼ inch.

Never attempt to force a misaligned tire onto a wheel with high air pressure. This can lead to wheel damage, serious injury or death, and is just plain stupid.

Clean wheel mounting surface on the brake drum or hub.

File off any burrs or sharp edges. Lug nut torque settings are as follows:

<b>Stud</b>	7/16"	12mm	½"	14mm
<b>Ft. lbs.</b>	55-65	70-80	75-85	85-95

Check torque settings on wheels often. If they have loosened, increase the torque.

**THIS IS JUST A PARTIAL SAFETY LIST. ALWAYS EXERCISE GOOD JUDGEMENT AND COMMON SENSE WHEN USING ANY RACING COMPONENT.**

## How long is the warranty on Bogart Racing Wheels?

### WARRANTY

Bogart Racing Wheels warrants to the original retail purchaser that products manufactured by Bogart Racing Wheels will be free from defects in material and workmanship under normal and intended use for a period of one (1) year from the date of purchase as evidenced by invoice or bill of sale, except that any such warranty shall be for a period of ninety (90) days with respect to any claim that the wheel is out of round. Discoloration, oxidation, and/or corrosion of the finish due to neglect and/or adverse weather or chemicals is not covered by this warranty.

Bogart Racing Wheels' sole and exclusive obligation under this warranty shall be to repair or replace at Bogart Racing Wheels discretion without charge, any Bogart Racing Wheel product which is returned (freight prepaid) and which, after Bogart Racing Wheels examination, shows that said product has failed in normal use and service due to defects in materials and/or workmanship.

Bogart Racing Wheels will not be responsible for any damage or loss caused by delays, or any consequential damage arising from any cause whatsoever, nor for labor, transportation, or any other charges incurred in replacement or repair of a defective part.

This warranty is void if:

- 1) 1) The wheels have been damaged in transit or misuse, accident, or negligence, or have been repaired or altered by one other than Bogart Racing Wheels.
- 2) 2) Wheels used on applications beyond its stated load or on applications other than the wheels specified use.
- 3) 3) Wheels that in the opinion of Bogart Racing Wheels have been used on streets or highways.
- 4) 4) Wheels that have been installed with any accessories or adaptors, etc., other than those supplied and/or approved by Bogart Racing Wheels.
- 5) 5) Damage incurred by mounting and/or installation.
- 6) 6) Original invoice or sales receipt is not available for verification.

This is a limited warranty. Therefore no warranties or representations, expressed or implied, including any implied warranty of merchantability or fitness for a particular purpose which extend beyond the descriptions and limitations of the face hereof and none shall be implied by law. Bogart Racing Wheels neither assumes or authorizes any other person or entity to assume for it any obligation or liability in connection with Bogart Racing Wheels' products uses or applications.

This warranty does not limit rights which may be available under individual state warranty laws.

**IMPORTANT:** All warranty returns that are reviewed by Bogart Racing Wheels warranty review department and found not to be subject to warranty coverage, will be returned to the sender, without repair or replacement, at the sender's expense..
