

Joe Gibbs Racing On-Track Test Results

JGR completes 1,200 mile, on-track engine durability test. Following a successful 900 mile durability test on a restrictor plate race engine using MicroZol XP2 restrictor plate oil, the JGR development team decided to repeat the test and extend the distance. Even with the addition of 300 miles, the XP2 oil (0W-20) and the JGP synthetic 75W-110 gear oil did their job. Drain samples are being sent for analysis and comparison to our 600 mile post race samples.
